TRUTH IS BETTER.

If "all gali" is still divided into three parts, es in our school days, a Tacoma paper-the News-has certainly melnopolized all of them: It makes these astonishing statements:

Tacoma has 20,000 inhabitants to Portland's \$5,000, but it one is increasingent size at the rate of \$0 per cent. per annum and the other steadily decreasing happutation; it costs from \$2000 to \$4000 for a vessel to get over the Portland bar and take a carpo there, whith \$2.00 will cover all the expenses at this port. Perfland has lost her supersuacy as a wheat magnet, even Oregon wheat causing through to Taccima, where it will command from 10 to 15 cents per boshel more my day in the year, thanks to the superior advantages as a abipping point and the monthair cost of lending a vessel as compared with the enormous expenses at Portland. Through prices of real existe ought to be double those of Portland, but they are not

It is no part of our purpose to underrate or belittle Tacoma. That city is having a fine growth but it is not growing faster than Epokune Falls, nor indeed so fast; for Spokane Falls is only about half the age of Tacoma, yet is fully as large, is quite as substantially built, has at this moment as many buildings under greaten and a wider range. buildings under crection and a wider range and greater volume of business. In other that of Spokane Falls has been more rapid still; for though Tacoma had largely the start, Spokane Falls in every respect now faily equals her. In the absence of a recent census the number of votes cast is no bad test of conniction, and Spokane Falls last November boasted a larger number of votes than Tacoma. Between Scattle and Tacoma we make no comparison, since we do not want to belittle Tacoma, and Scattle is the The three cities are all tipe and active cities, and are making very rapid and very substantial progress. But all of them together have scarcely more than Portland's , though no doubt their combined pulation will soon exceed ours; nor can of them together yet equal Portland's

wealth and business. Portland need not underrate any other city of the Northwest. Her own position is secure. Her own volume of business never was so creat as now; her pre-eminence in the business of the Korthwest has never more marked. Among her best cus ners are the rapidly growing cities of Washington, including Tacoma. Portland Dever before sold so many goods either at Puget sound or in Eastern Washington as is selling now. This is a gratifying fact that attests the rapid growth of population, wealth, industry and business there. The population of Portland proper, is stated by the Tacoma News not incorrectly at 45,600. But there should be added not less than 15.000 for the east side suburbs. Tacoma's present population may possibly approach
20,000. No impartial observer estimates it
higher. The vote of the city last November (about 2000) indicated no more than 13,000 at that time, and even if the city is growing at the rate of 50 per cent. to year, as the Acus surprisingly rapid, and neither one of the gation to the legislature.

cities has any reason to overstate its own The next six months will determine owth or to belittle tight of any neighbor. It is said that "Porlland has lost her su-premacy as a wheat market." This is put in a livers and managers. way that would mislead those not acquainted

with the situation, past and present. Before the railroad era Portland was the only wheatshipping point in the Northwest, because the only point available for that business. Portland did not expect to remain the sole wheat-shipping point alter railroads had been built to other shipping points, from the wheat-growing country. The Northern wheat growing country. The Northern Pacific has built a line over the mountains and feeders, occupies a large wheat-producing country in the interior, and week is carry all the wheat it can to Tagoma is quite many cargoes of oma during the past year (chiefly by Portland houses); but Tacoma's shipments as yet make no comparison with those of Portland. Seattle, upon completion of the Lake Shore & Eastern road, will also become a ahipper of wheat, for every road will develop a territory and business of its own. But the men acquire lands for the timber on them assertion that wheat commands from 10.40 its cents of the work of the control of the shipper of wheat, for every road will develop in Taconia then in into effect, will change all this; and, white Portland does not expect to do the whole wheat business of the country as she did when she was the soll point to which access could be had from the landerier, she does expect to a point to which access could be had from the landerier, she does expect to a point to the country of the countr

SONIAN that makes this compenson. But perhaps it may be as well to suggest that Portland's values, if they were not well founded, if they dat not depend on real zell things, would not be flouble, or more than double, the values at Facenia, with all the "booming" Tacoma nay had. The Tacoma journal unconscious: pays a tribute to seem to be conditions that will meet all the Portland's strength and presentance. wants of our time and preserve tile land for

pournal unconscious; pays a tribute to provide a portland; strength and pre-enumence.

There is no envy at Portland of the ricing thise of Wishington territory. Portland has too much sense and too much dignaty for that, and, moreover, is big enough and strong enough to take, care of herself. Itstween three cities of Washington territory there is a fine race for the primacy, and it seems as yet uncertain which will eventually lead though Sauthe sith bolds the firer ally lead, though Seafthe still holds the first place, and we think it quite likely for the future to hold it. Portland has good wishes future to hold it. Portland has good wishes for all of them; she is not so narrow as to magine there is room, but for a single city in the great Northwest, nor does she rely on gaining anything for berself by interpresentation of her neighbors. It is right for each city to pash for itself, and their competitive effects will bring creat benefits to the country. The Tacona paper that says "the population of Portland is steadily decreasing," that says so false and about a thing as a means of helping its own towns if it does not discredit its own than by the statement, not discredit its own than by the statement, certainly dishonors itself. There is great and rapid growth throughout the whole Northwest. Every village, town and city. every community in Oregon, Washington, Idabo and Montana feels the impulse and feels its effect in a new thrill of life; and Tacoma, though she is by nd means monopolizing though she is by nd means monopolizing this, or making greater strides than other places, nevertheless is coming along with leaps and bounds, with all the rest. It would be well, however, for her credit, if her newspapers would be more careful about the newspapers.

notion that their city has anything to gain for itself by false depreciation of other places in the Northwest. It is a vice of Ta-coma journalism to belittle other cities even in its own territory, so Portland, of course, can not expect to escape. But Portland is amused rather than offended, and The Ore-GONIAN Engles mention of the matter chiefly through the spirit of neighboriness and for

A REORGANIZED PARTY. . .

The recent appointment of Erhardt to the collectorship of New York and Van the postmastership mean a reconstructi of the republican organization that shood for republican success under Arthur and Conk-ling, until Garfield, Blaine and Whitelaw Reed joined hands to put Arthur and Conk ling down. This triumvirate accomplished its purpose; it destroyed "the machine." but lived to discourt that in destroying it and setting up its own "machine" in its place, it had defeated the party: When Blaine needed "the machine" in New York in 1884 he could not find it. That efficient organization of the republican rank and file. established and administered with singula established and administered with Singular tact and skill by Arthur, was demoralized, and while Blaineslew it by "knifing" Arthur and Conkling, nevertheless his success proved joiltical suiteide, for in 1884, when he sorely needed "the machine," declined to come to his Erhardt is an fold friend and trusted lieutenant of Arthur and Conkling; he is an ardent, aggressive republican of great energy and administrative ability, and Van Cott is a man of the same school and training Hence the appointment of these men means the recognition of the republican party in New York. This republican "machine" will represent President Harrison's policy to put none but true and able men on guard

but it will lose no chance to strengthen the

nation to be under republican administration rather than under democratic, it is

legitimate and honorable for the administra-tion to use its powers and opportunities to strengthen the lighting efficiency of the party that voted that administration into The president of the United States ought to be the leader of his party, not in the sense of using his enormous public powers and opportunities for his personal aggrandize-ment, but for the growth and perpetuation of his party. A president could not honorably intrigue for renomination by seeking to secure, through patronage, the election of delegates pledged in his favor; he could not honorably seek to control a caucus or cajole the primaries through officeholders, but he could honorably do what President Arthur-did that is, he could put all personal in-trigue for his own advantage behind him, and yet let no opportunity slip to strengther the fighting forces and policy of his party.

After Collector Arthur's strong fand let go
of the wheel of the Republican ship in New York thousands of votes were lost to its ranks. Under Arthur's generalship the quarrels of the party were always composed, and it acted with the courage, the unity and the discipline of Cesar's legion. To restore this discipline perfect party organization is purpose of such appointments purpose of such appointments as those of Collector Ethardt and Postmaster

Van Cott. The necessity of such an effort is shown by the fact that the republicans, by foolish party feuds, threw away a spletalid opportunity to have captured the gravoraity claims (though of course, this claim is ex., regained their old time footbold in the high-travagant) it will hardly have 20,000 with est courts, the district attorneyship the which to begin 1800. Still, it is making ex-cellent growth; indeed its growth, as well as that of Scattle and Spekane Falls have

TIMEER AND TIMBER LANDS.

The whole truth concerning the securing of timber lands by the great milling compa nies is not made public, but it is k nown that these companies have become the owners of immense tracts of the very best timber in Oregon and Washington, and that scarcely an acre has been honestly acquired. They resort to all sorts of devices to defeat the law and secure the land at a trifting cost. Usually they employ men who enterland and swear they do so to own it for themselves. and have no bargain or understanding for its sale. When the time is up for commut-ing with the government the amoney is always forthcoming to pay up for it, and a bonus of several hundred dollars is paid to the locator, who has done all the false swearing. Thus law-breaking and perfury have

It would seem possible to make some rea-If would seem possible to make some reasonable provision for the sale of timber to come seems not to be an established wheat market, since the journals of that city do not make regular quotations, though we observe one of them does get to Egraphic quotations of the Portland market. Towage and pilotage on the Columbia river have, indeed, been so high as to put Portland at a disadvantage, but the new arrangement, just now going to leffect, will change all this; and, white sonable price rather than to be all the time on the quivas through fear they cannot secure a permanent supply. Then the government, though it charges but a small price for its timber, will realize chough to challe it to pect to maintain her whent shipping business and, moreover, to increase it.

It is said by the Tadonna paper that "the Tadonna prices of real estate ought to be double those of Portland, but they are not double those of Portland, but they are not stead net. As it is now, the specificator real-content profits on the timber and then deizes great profits on the timber and then de-mands a high price for the land at the ex-pense of the intending settler. To sell the simber for the we of millinen and reserve the land for the actual settler, or let the set-tler take it with the timber on and live his time on it to complete his homestead title, these

> The wholesale fraud and dempralization that have so long existed should be avoided by some legal means. There seems to be a necessity that compels millmen to protect themselves and provide for their fature. We continually hear of other companies that are preparing to commence operations with tunnense capital. The need of this great capital is to scoure timber hand, and this can only be done by dishonest means- outside of the Northern Pacific land grant. It must be that some resource is within the power of the government for the prevention of fraud and the supply of timber to the numerous milis now existing and to be started. The state of Oregon and all other efates where timber is so abundant and so valuable are interested to have the great milling enter-prises conducted with success as a part of the business prosperity of the country. All timber states are also interested in seeing the public lands remain for the use of actual settlers. These beavily timbered lands have often very rich soil, and when cleared can be made good grazing lands by soying grass seeds on the "burn". The timber shark te-comes a land shark when the forest is gone and speculates on the would-be settler for the interest of state and general govern-ments that the settlers should find land for

A Liven Street Row—At half past 6 a dot 1 last inght two or three drunken men got into a fight on the corner of Third and A streets and in a ver short time the crowd that congregated was large chours to make a fair vized army A drunaut butcher to time a fair vized army A drunaut butcher to time a dispute with an equally as drunk a countryman about his ability to skin an or He owed that he could skin a criter n less time thon any other man in the city. The countryman took exceptions of this and the fight commented. Several blows were a changed when both rolled into the guiter A third man fully as drunk as either of the two-who were fighting seing the encounter, made things more it will be a country to the first mental consent of those engaged in it for sutual consent of those engaged in it. The lirrer men wons their separate ways without distributing the police and the crowd reluctantly dispersed. The VeGTABLE MAYEM —Commission men asy that the amount of green vegetables—lettuee, rudinker opions, rhubarh ate—now being ris covied here doily is something wonderful and that more of thise farden sass is being shipped in a day than in former years used to be in a mouth Several persons in different sections have gone into the uniture of rhubarh or pne-plant, and some of these send in three to four hundred pounds per day of this healthful vegetable. (ab bages are consumed is a conundrum. The cabbage, is a wholesom and matrificous vegetables for those who like it, but it is not considered an elegant dish when boiled with ports for lare supper. We have learned in our business experience that the merchants who watch for the things possible and do not attempt the impossible are the successful ones. We found out long ago that it was not among the possibilities to do a long time credit business and at the same time become leaders in low prices. We adopted our motto, "One Price to All," terms strictly cash, and have made friends by the score by adhering to this policy. It gives us the coin to handle large quantities of goods at spot cash prices, and makes it possible for us to give immense "special sales" at which we dispose of vast quantities of goods at prices impossible for credit houses to compete with. Our "Special Sales" have become a part of the history of our house, and are waited and looked for by thousands in the Pacific Northwest. We dispose of more goods at one of these sales than many large concerns would dare purchase. Why is all this? you sake simply because our "Special Sales" are genume affairs. We make sweeping reductions and no make believe business. We do you a favor by selling you goods cheap, and do ourselves a favor at the same time by turning into cash at a small profit large blocks of merchandise. As per announcement in our last "ad" we will open the summer campaign by a great

ABSOLUTELY PURE.

For quick raising the Royal Baking Powder is superior to all other leavening agents. It is absolute pure and wholesome and of the highest leavening power. It is always uniform in sength and quality and pever fally to make light, sweet, most palatable and nutritiv food. Bread, biscuits, muffins, cake, etc., raised with Royal Baking Powilir may i caten hot without distressing results to the most deheate digestive organs. It il keep in any climate without deterioration.

Prof H A Motte. S. Government Chamist, after exatening officially 'ho principal baking powds of the country, reported "The Royal Baky Powder is absolutely pure, for I have so found it in many

resis made both for th company and the United States Government.

"Because of the filties that company have for of taning perfectly pure cream of tartar, and for other easons dependent upon the proper proportions of the same, and the method of "preparation, the Royal Baking Powder is undoubtedly the purest and most reliable haling powder offered to the public
